## Frontend Developer

Frontend Developer with 3+ years of experience building responsive, high-performance web applications using React.js, Next.js, and Tailwind CSS. Expertise in delivering pixel-perfect designs, seamless user experiences, and integrating payment gateways and real-time communication features. Adept at optimizing applications for scalability and cross-device performance.

## WORK EXPERIENCE

### Frontend Developer - Pun Game (NFTs)

JUN 2024 | REMOTE

- I developed a web application from scratch using **Next.js, websocket, wallterConnect, and Postgres** as the core tech stack
- On the design side, I achieved a **pixel-perfect** and responsive integration, ensuring that users on various devices could smoothly **connect, create lobbies and join** their friends through a lobby code to start the game.
- The game mechanics involved **drawing and guessing words** based on the drawings. I integrated **websocket** for real-time communication, managing the whiteboard, timer, and round handling.
- I implemented backend solutions to handle **HTTP requests**, managing each user's global score and displaying it on a player ranking leaderboard

### Frontend Developer - HeyAndes

MAR 2021 – AUG 2023 | REMOTE

- Built landing pages and web applications for tourism agencies, handling everything from design to production while applying **UI/UX principles** and **executing growth strategies using React JS**.
- Optimized SEO by enhancing website performance, addressing key aspects such as load speed, image optimization, and **keyword research**.
- Contributed to the integration of Firebase and WordPress plugins in the **web development** process.

## PROJECTS

### Frontend Developer - Own Crowdfunding Project

- Developed an interactive and dynamic user interface using **React**, creating reusable components to ensure a seamless and **responsive user experience across all devices**.
- Integrated Firebase to manage real-time databases, user authentication, and file storage, while configuring security rules and optimizing queries to improve performance.
- Implemented a secure payment gateway, **utilizing popular APIs to process** crowdfunding transactions efficiently and safely.

Frontend Developer - Task Board

- Task Board is a highly intuitive tool that efficiently manages pending, in-progress, and completed tasks with **flexible organization**.
- Tackled technical challenges in frontend development, **managing complex states** for each task card and its respective column.
- Optimized the user experience with a **responsive drag-and-drop feature**, ensuring smooth interaction across devices.

EDUCATION

Bachelor of International Business

Continental University | Peru  
2016-2021

Reactjs, NextJs y Tailwind

LeonidasEsteban.com  
2021-2022

React Developer

Epicreact.dev  
2022-2023

Escuela Desarrollo Web

Platzi  
2023-2024

Developer and Beyond
