WORK EXPERIENCE

Frontend Developer - Pun Game (NFTs)

JUN 2024 – PRESENT | REMOTE

- I developed a web application from scratch using **Next.js**, **websocket**, **wallterConnect**, and **Postgres** as the core tech stack
- On the design side, I achieved a **pixel-perfect** and responsive integration, ensuring that users on various devices could smoothly **connect, create lobbies and join** their friends through a lobby code to start the game.
- The game mechanics involved **drawing and guessing words** based on the drawings. I integrated **websocket** for real-time communication, managing the whiteboard, timer, and round handling.
- I implemented backend solutions to handle **HTTP requests**, managing each user's global score and displaying it on a player ranking leaderboard

Frontend Developer - Own Crowdfunding Project

MAR 2024 – PRESENT | REMOTE

- Developed an interactive and dynamic user interface using **React.js**, **Express**, and **Firebase** as the core tech stack, achieving a pixel-perfect and responsive user experience.
- Implemented Firebase to manage a **real-time database**, **user authentication**, and **file storage**, configuring security rules and optimizing queries for enhanced performance.
- Integrated a **secure payment gateway**, enabling users to contribute to crowdfunding projects by utilizing well-known payment APIs to process transactions securely and efficiently.

TECHNICAL SKILLS

- HTML
- CSS
- Styled Components
- Tailwind CSS
- JavaScript
- TypeScript
- React.js
- Next.js
- Firebase
- websocket
- Git / GitHub
- Responsive Design
- UX-UI
- Figma
- Performance Optimization
